LIQUOR SQUAD TEAM-UP IN FRIDAY NIGHTS BATTLE

On Friday night, Jan. 30, at a dance at Balzac four men were arrested by the Calgary liquor squad, among them one a resident of Crossfield district, Virgil Green, who contends that with two friends from Calgary he was sitting in his car near the dance hall, when he was arrested for being drunk.

He was taken in the liquor squad car to the Cavender farm, and while sitting in the car on the road side was tried before Magistrate Lewis and pleaded not guilty. He was found guilty and fined.

He contends he was brought back to Crossfield, got out of the car and went into the Home Cafe, leaving the Cafe shortly after by the back door and going down the alley met two of the liquor squad who started to beat him up, with the result that Green suffered from a cut lip and had to run to protect himself from what he considered a serious beating.

Taking this at its face value, having been given the information direct it appears to us that this is a matter for Government investigation. We agree with the law being upheld and enforced and hold no brief for those who go to dances and make themselves obnoxious, but conduct such as above described, is far from beneficial to law and order.

Large Addition to Be Added to Crossfield Garage

F. T. Baker of the Crossfield Garage will commence within a few days the erection of an addition to his present garage. The new building will be 44x75, stucco finish and fire proof. The garage will accommodate thirty cars and will be heated with a large pipeless furnace.

A Ladies rest room with every modern convenience will be included in the building. This is something that will fill a long felt want.

Mr. Baker has every faith in the future of Crossfield and a building of this nature is a decided asset to the town.

All Ready For Monday Night

Don't forget the Board of Trade banquet in the Masonic Hall on Monday, February 9th, at 7 p.m. An interesting program consisting of Moving Pictures, Lantern Slides, Community Singing and Musical Selections has been arranged and after you have satisfied the "inner man," with good things to eat, you will enjoy yourself.

Open to all members of the Board of Trade and their wives, all teachers and trustees of the surrounding district.

Supper plate 50c.

Crossfield Music Club

The Crossfield Music Club held their annual meeting on Jan. 31. The Club decided that they would change the name from "Sunshine" to "Crossfield" as Crossfield is now its headquarters.

Orchestra practises are to be held regularly each fortnight.

The officers elected are as follows: Hon. Pres. and leader, Mr. Olson; President, Gladys Metheral; Vice Pres. Ross Ford; Secretary-Treas. Ruth Stauffer; Pianist, Marjorie Metheral; Directors, Mr. Ainscough, Mr. Richardson, Mr. Green.

Landing Field Illuminated

The lights on the government airplane emergency landing field located on the Ferguson farm were turned on Thursday evening of last week. The large beacon light can be seen for miles; there are also 38 ground lights which outline the field.

ANNUAL MEETING WELL ATTENDED

Ivor Lewis and R. Nichol Nominated--Election on Monday

The regular meeting of the Village Council was held prior to the annual meeting.

Present: Mayor Williams and Councillor Amussen.

The minutes of the previous meeting were read and adopted.

COMMUNICATIONS

From the Calgary Power Co. stating that as the revenue from the Village of Crossfield had exceeded \$6,000 during 1930, the consumers of power and light will enjoy a reduction 10c per month on the service charge.

From the Calgary Fire Dept. thanking the Council for cheque of \$25.00, which had been sent to them in appreciation of services rendered at our recent fire.

From the Dept. of Municipal Affairs, stating that the Supplementary Revenue Tax will apply to land values only in 1931.

Mayor Williams stated that the Council had met with the management of the U. F. A. Hall and he outlined the discussion that took place with them, in which they wanted the present license fee of \$50.00 a year reduced.

Moved by Councillor Amussen that the present license fee on their hall of \$50.00 a year remain as at present. Carried.

ANNUAL MEETING

Secretary - Treasurer McRory read the financial statement for the year.

Mr. Amussen objected to the secretary-treasurer salary of \$300 a year. He thought that all salaries should be reduced.

The financial statement was adopted as read.

D. K. Fike was elected as chairman for the annual meeting.

Mayor Williams was called on by the chairman to give an account of the year's work. Mr. Williams took up the financial statement and showed that he had a firm grip of the work in hand as he explained in detail the different items of the statement.

He also pointed out that he figured it would be better to arrange for some permanent supply of water for the skating rink. For several years of the past the Village has been spending money on hauling water, sinking wells, etc. and had nothing to show for it.

He produced plans of a 500 barrel storage tank that could be built in a central part of the town and used for fire protection and for the skating rink, he wanted to know of any suggestions the ratepayers might have in this regard.

At 8 o'clock Mr. McRory, who was acting as returning officer, declared the meeting open until 9 o'clock for nominations for councillor for a three year term. In the mean time the business of the meeting went on.

In order to get the water supply for the skating rink under discussion Mr. McRory made a motion that the rink be moved to the well. This motion was seconded by Alex Gordon and the debate was on.

Tredaway, J. P. Metheral, H. McIntyre; W. McRory, discussed the water situation for fire fighting and for flooding the rink pro and con. It was finally decided on motion of J. Williams seconded by H. McIntyre, that a cistern be dug around the present well at the rink and large enough to hold a sufficient supply of water to supply the skating rink. This motion met with the approval of the meeting.

At nine o'clock Mr. McRory declared nominations closed. Ivor Lewis and R. Nichol had been nominated and that an election

102 million more cups of Salada tea were consumed in 1930 than in 1929 by the people of Canada.

Taking the Census

One of the important pieces of work to be undertaken by the Federal Government this year is the census enumeration of the people of Canada, and the compiling of a vast amount of other information dealing with the status of our citizenship, and indicating the development of the Dominion within the past ten years.

The taking of the census is a big job, and an exceedingly important one. It requires elaborate and complete organization, careful publicity to acquaint people with what is expected of them when the enumerators call, and a small army of men to gather the information required, and another large group of experts to assemble and classify the information when it is received by the Department at Ottawa.

It is quite possible that some people look upon the taking of the census as a matter of comparatively small importance, and that, at this time especially, the large expenditure of money involved could be put to much better use. Such a view, however, is not only very superficial but quite erroneous. Taking the census is important in any country, but in no other country does it have quite so pronounced an effect as in Canada, and more especially in Western Canada.

In the first place, the representative of each Province of the Dominion in the House of Commons at Ottawa is based upon the census figures. The constitution of Canada stipulates that the basis of representation in the House of Commons shall be one member for each one-sixty-fifth of the population of Quebec. That is, Quebec shall be represented by sixty-five members regardless of its population. Dividing the total population of Quebec by sixty-five gives the number of people represented by each member, and that same number of people in each of the other Provinces become entitled to a member. In other words, an absolutely fair basis of representation is thus arrived at.

Money grants to the Provinces from the Dominion Treasury are also based upon population, but in the case of the Western Provinces a larger number of grants rest on this basis than is true of other Provinces. For example, grants to these Provinces in lieu of lands increase as population increases until the maximum is reached. Consequently it is important that an absolutely accurate census of our people be recorded, and especially so in the case of the West which is the most rapidly growing section of the Dominion. Increased western representation at Ottawa will likely have a profound effect upon national policies, while larger money grants will enable our provincial governments to meet the growing needs of these western communities.

The census is likewise a national stock-taking. It will reveal the extent of our growth and development as a Province, and as a Dominion within the past ten years. It will reveal to us evidences of national strength and disclose where weaknesses exist. For all these reasons it is important that every citizen fully co-operates with the enumerators and officials in making the census this year complete and accurate in every respect.

The census of 1931 will be the seventh decennial census of Canada since Confederation. It will be of interest to recall what the previous six "counting of noses" disclosed in the matter of Canada's population. Following Confederation in 1867, the first census was taken in 1871 and revealed a population of 3,485,761. By 1881 the population has grown to 4,342,810; in 1891 to 4,533,239; in 1901 to 5,371,315; in 1911 to 7,206,643, and in 1921 to 8,788,483.

It will be noted that whereas between 1881 and 1891, and between 1891 and 1901, the population increased by only half a million in each ten year period, the increase between 1901 and 1911 was nearly two million, and between 1911 and 1921 a million and a half. That is, whereas Canada's population only increased by one million in the last 20 years of the nineteenth century, it increased by three and one-half million in the first 20 years of the twentieth century.

The settlement of these Western Provinces accounted for much of this larger increase. In later years, however, there has not been the same phenomenal flow of immigration into the West, while on the other hand, the great productive and purchasing power of the West has contributed enormously to the industrial growth and prosperity of Eastern Canada. As a result, this year's census may not disclose the same ratio of increase in the West as compared with the East.

In view, however, of the important bearing which the census has upon both the economic life and the public administration of affairs of Canada it is, let it be repeated, of the utmost importance that all citizens co-operate thoroughly with the army of officials entrusted with taking this year's census in order that it may be a most efficient and reliable statistical record of the Dominion.

Propose Canadian Air Tour

Plan Suggested At Convention of Clubs in Montreal

A national air tour that would extend from the Atlantic to the Pacific, and in which every aeroplane club would participate, was proposed at the convention of the Canadian Aeroplane Clubs' Association held in Montreal. The tour as outlined by its proponents would be as much as possible representative of the advancement made by Canada recently in the field of aviation. An armada of "planes going from airport to airport" would, it is thought, have its beneficial results from the point of view of the public.

Canadian Construction Figures

Construction in Canada During Year 1930 Was Well Above Average

The value of all construction contracts awarded during 1930 as compiled by MacLean Building Reports Limited, amounted to \$459,000,000 as compared with \$376,651,800 in 1929; and while this is a decrease of 20.7 per cent, it is to be noted that the year 1929 was the most active year for building that Canada has ever had, being 22.1 per cent. ahead of 1928. The totals for 1930 by provinces were: Ontario, \$175,459,000; Quebec, \$154,072,000; British Columbia, \$22,987,000; Saskatchewan, \$27,361,000; Alberta, \$25,081,000; Manitoba, \$22,010,000; New Brunswick, \$1,067,000; Nova Scotia, \$7,238,000 and Prince Edward Island, \$1,120,000.

American investments abroad now total more than \$7,000,000,000.

Cuba now has nearly 2,000 miles of federal highways.

Germs Revived After Centuries in Rock

Adapt Themselves To Airless Condition and Learned To Live Without Breathing

Suspended animation in case of germs for as much as 1,000,000,000 years was demonstrated by Prof. Charles B. Lipman, of California University, before the American Association for the Advancement of Science.

Dr. Lipman said that proof of bacteria surviving for hundreds and even thousands of million years was found by him in pre-Cambrian rocks and in coal deposits.

These life germs, which normally require oxygen, adapted themselves to an airless condition and learned to live without breathing.

When rock and coal were crushed in sterilized mortars the powder was nourished in a nutritive medium of coal extract with one per cent. peptone, the spores began to live again after millions of years of inhibited life.

MIDDLE AGE

A Critical Time For All Women

"I am beginning to feel my age" is the confession many a woman has to make when she reaches the critical time of middle life. There is no need, however, to think you are too old to be well and happy.

Perhaps you have lost your grip on things; perhaps the old vigor and energy is lacking; you get tired easily, and your limbs ache terribly. Often your back seems ready to break and the pain is unbearable. Your blood at this time has become thin and impure and does not give the health-giving nourishment to the body. What you need is a treatment of Dr. Williams' Pink Pills. They will set you right. They actually make rich, red, health-giving blood and this good blood will drive out all your aches and pains.

Dr. Williams' Pink Pills will banish headaches, backaches, nervousness and lack of appetite, and in their place will come new energy and happiness. You can get these Pills at all medicine dealers or by mail at \$5.00 a box from Dr. Williams' Medicine Co., Brockville, Ont.

Evolution Of the Windmill

New Use For Windmill Is In Connection With Airplanes

Windmills, like many other things and people, have moved with the times. In their new guise, they may possibly not be so picturesque as their forerunners, but they are playing an important part in the industrial life.

Modern windmills pump water, also supply electric light for light-houses.

The most up-to-date use for the windmill is in connection with airplanes. The auto-giro, or windmill plane, is now so far advanced that Thomas Edison, the world-famous inventor, has expressed his firm belief that this invention will revolutionize world flying.

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthfulness. They are an excellent remedy for these evils.

Vast Sums In Life Insurance

One Hundred and Eleven Billion Dollars Of Life Insurance In Force

Since the close of the Great War, life underwriters have brought into being a far larger estate than the combined national debts of the belligerent nations. Frank M. Ste of St. Louis, Mo., told the educational congress of the Life Underwriters Association of Canada, held at Ottawa.

He said there was one hundred and eleven billion dollars of life insurance in force, guaranteed by eighteen billion dollars as a reserve fund. This staggering total of assurance was being by seventy million people, one-fifth of whom were on the American continent.

Firewood for cooking is still used in more than half the farm homes of New Hampshire, judging from a recent survey.

Export Of Tolem Poles

Investigation Is Ordered In Respect To Carload Shipment

Acting on representations from Premier S. F. Tolmie, of British Columbia, the Dominion Government ordered an investigation into the removal of a carload of totem poles shipped from Prince Rupert for a United States museum.

It can be noted that the export of Canada pending the enquiry. The premier, on being informed of this shipment, telegraphed immediately to Prime Minister R. B. Bennett, protesting on the ground that the fastidious art of the totem should be preserved as far as possible. Mr. Bennett telegraphed Dr. Tolmie re-examining the matter that the whole matter would be the subject of thorough investigation.

Recipes For This Week

(By Betty Barclay)

BRAN GINGER CAKE

½ cup shortening.
½ cup sugar.
1 egg.
1 cup all-bran.
1½ cups flour.
½ teaspoon salt.
1 teaspoon soda.
1 teaspoon ginger.
2 teaspoons cinnamon.
½ cup sour milk.
½ cup cream shortening and sugar together. Add the egg; beat well. Add the bran. Mix and sift the dry ingredients and add them to the first mixture, alternately with the sour milk and molasses. Pour into greased pan and bake in a moderate oven (375 degrees Fahrenheit) from 30 to 40 minutes. Yield: 10 servings.

FRUITED WHIPPED CREAM

3 tablespoons confectioner's sugar.
1 cup cream, whipped.
1 marshmallow, finely cut.
½ cup dates, seeded and cut in small pieces.
½ cup nut meats, broken.
½ cup each, candied cherries and pineapple, finely cut.
Add sugar to cream. Fold in remaining ingredients.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Ceded To China

Area Of 285 Square Miles Handed Back To China After Being 32 Years Under British Rule

The British Empire is 285 square miles smaller than it was several years ago.

Wei-hai-wei, which for thirty-two years has been under British rule, has just been handed back to China, and so, as its area was 285 square miles, the British Empire is now that much smaller.

The natives of Wei-hai-wei have no benefited under British rule that they were not at all anxious to be handed over to their native government, and indeed, asked that they might remain British.

Light Fiction

Novel reading can become a habit so harmful as tea-drinking and indulged in with as much mental benefit. It is too easy to be of value. No reading is of any cultural value unless it demands something from us. A book has to be at least a little difficult to be worth reading at all. —Everyman (London), England.

Homestead Regulations

Changes Made On Recommendation Of Minister Of The Interior

Regulations governing the conversion of patented pre-emption or purchased homesteads into soldier grants have been altered in an order-in-council noted in the Canada Gazette. Changes have been made on recommendation of Hon. T. G. Murphy, Minister of Interior, who found that several applicants are debarred from making such conversion on the ground that they had already obtained patent for their pre-emption or purchased homestead.

The new provisions are as follows: "1. Where patent for a pre-emption or purchased homestead has been issued, or where such patent has not yet been issued, if the holder of the pre-emption or purchased homestead is permitted to convert the same into a soldier grant, all sums paid on account of principal or interest in connection with the said pre-emption or purchased homestead may, upon application, be refunded to the holder of the land, or to the soldier settlement board in cases where an advance has been made under the provisions of the Soldier Settlement Act.

The foregoing regulation shall be deemed to be retroactive in its application."

Wonderful For Indigestion!

When your stomach feels bad; when you feel bloated, gassy, or after eating a meal you feel miserable—a single dose of pure Bismuth Tablets will relieve you.

For indigestion, the prompt effectiveness of Bismuth Tablets is really wonderful. Even the most obstinate cases quickly respond. Pleasant and inexpensive to use. Ask your druggist.

Deaf Children Are Happy

Little Ones At Belleville School Do Not Feel Handicap

"No finer demonstration of the rapid advance which has been made in the care and treatment of deaf children can be found than at the Ontario School for the Deaf at Belleville," says the Ottawa Journal. "No sign of sadness, no sense of handicap or futility is to be found amongst these children, and despite the fact that 90 per cent. of them cannot hear a single word, they carry on animated conversations, play games, sing and dance, just the same as other little ones who have no such handicap."

"Did you cancel all my engagements as I told you, Smithers?" "Yes, sir, but Lady Millers didn't take it very well. She said you were to marry her next Monday!"

Felt Tired Out All Day

Could Not Sleep at Night

Mrs. Aldamond Lalonde, 2481 St. James St., Montreal, Que., writes:—"After a spell of the grippe I was left very nervous, and felt drowsy and tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills and after taking four boxes I was completely relieved of my trouble, and can recommend your Pills to everyone."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

COMBINES ACT HELD VALID BY PRIVY COUNCIL

London, England.—The Combines Act of the Dominion of Canada is valid, according to the judgment handed down by the judicial committee of the Privy Council, dismissing an appeal from the Proprietary Articles Trade Association of Canada.

Thus the privy council backed the unanimous opinion of the Dominion's Supreme Court, climaxed a four-year's legal battle and opened the way to several investigations of combines.

The case was argued before the privy council last June. The act was passed by the Federal parliament in 1923 to replace the 1919 act, which had been declared invalid by the privy council.

The provincial governments of Quebec and Ontario both supported the contention of the Proprietary Articles Trade Association that the Federal act was invalid.

The P.A.T.A. also contested the validity of the section 498 of the Criminal Code of Canada, and in dismissing the appeal their lordships upheld the validity of this section.

The judgment said that in their lordships' opinion section 498 of the Criminal Code and the greater part of the Combines Investigation Act fall within the power of the Dominion government to legislate as to matters falling within the class of subjects in the criminal law, including the procedure in criminal matters.

The substance of the act, the judgment continued, is to define and to make criminal, combines which the legislature, in the public interest, intends to prohibit. The definition is wide and may cover activities which have not hitherto been considered criminal.

"But only those combines are affected which have operated or are likely to operate to the detriment or against the interest of the public," and if parliament genuinely determines that commercial activities, which can be so described, are to be suppressed in the public interest, then their lordships see no reason why parliament should not make them crimes.

The criminal law, the judgment went on, is certainly not confined to what was criminal by the law of England or of any province in 1867, when Confederation came about. The power must extend to legislation to make definitions of new crimes.

It is not enough, however, for parliament to rely solely on its powers to legislate as to criminal law, the judgment added. The remedies given under sections 29 and 30, reducing the customs duty and revoking the patents, have no necessary connection with criminal law.

Their lordships have no doubt that they can both be supported as being reasonably ancillary to the powers given respectively under section 91. The judgment declared it is unfortunately beyond dispute that in a country where a general protective tariff exists, persons may be found to take advantage of the protection, and within its walls form combinations that may work to the public disadvantage.

It is an elementary point of self-preservation that a legislature which creates protection should arm the executive with powers for relaxing the protection if it is abused, the judgment declared.

The same reasoning applies to grants of monopolies under any system of patents. The view their lordships have expressed makes it unnecessary to discuss the further ground upon which the legislation has been supported by the reference to the power to legislate under section 91 "for the regulation of trade and commerce," the judgment continued.

Manitoba Seed Fair

Will Be Held In Conjunction With Winter Fair On March 18

Brandon, Man.—Judging by early inquiries, the provincial seed fair to be held in conjunction with the Manitoba Winter Fair, March 18 to 20, will be larger than ever. Now in its seventh year, the seed fair has grown by leaps and bounds and it cramped the generous show space in the Arena building last year. As the fair is an opportunity for growers of surplus grain, grass or clover seeds to get in touch with prospective purchasers, the exhibition is expected to have more than its usual interest in March.

Claim Commander Was Drunk

Crew Of Canadian Vessel Testify Against United States Officer

New York.—Seamen from the Nova Scotia power boat "Josephine K." appeared before the coast-guard board of inquiry to testify that Boatwain Karl Schmidt of the "CG-145" was drunk when he boarded the Canadian vessel after its capture near Ambrose Light. Schmidt, who had admitted he fired the shots, one of which fatally injured the boat's master, William Chuet, Lunenburg, N.S., was in court and heard witnesses swear that after the capture he continued drinking in the forecastle of the run-runner.

Louis Selig, who described himself as an able seaman from Halifax, N.S., gave the main testimony for members of the crew. Schmidt, he said, seemed "good and drunk" when he saw him shortly after the "Josephine K." was boarded. The boatswain had pointed a gun at Allan Falkenham, Lunenburg, and maintained he would have to shoot to be released. Schmidt's name did not appear on the ship's crew list. Schmidt, he said, staggered, his face was red and his eyes "glaring." The commander of the "CG-145" stayed in the forecastle several hours, and while there consumed six bottles of ale and two drinks of rye whiskey, during which time all members of the "Josephine K." crew had an opportunity to witness his conduct.

Seaman Allan Falkenham said he thought Schmidt drunk; that he waved a gun and told him he would shoot him if he didn't belong to the ship. Harry Jewell said: "He was falling all over himself, and rolling around."

Need For Early Session

Rt. Hon. Mackenzie King Issues a Statement

Ottawa, Ont.—With the declaration that in some parts of Canada today the distress is greater than it has ever been, Rt. Hon. Mackenzie King, leader of the Opposition, has issued a statement calling upon the prime minister to shed some light on when parliament will meet. Notwithstanding that the government has a free hand with its policies and expenditures, "conditions in Canada today are much worse than they were at the time of the calling of the special session in September last," asserts Mr. King.

"There is, at present, much more need for the regular annual session of parliament to consider the conditions of the country's affairs than there was for any special session in September," added the Opposition leader.

Mr. King remarked that "the pretext that the reassembling of parliament should wait over until the arrival in Canada of the new Governor-General cannot be taken seriously." He comments on the fact that Premier R. B. Bennett is going to Washington, and expresses the hope that "before the prime minister embarks upon further missions which take him away from Canada he will at least let the country know when it may expect the reassembling of its parliament."

Asking Lower Freight Rates

B.C. Government Will Back Growers and Cannerymen in Fight

Victoria, B.C.—The government will get behind British Columbia growers and cannerymen in their fight for lower freight rates to the prairies. Premier S. F. Tolmie has instructed Leon J. Lander, K.C., government rate counsel, to co-operate with the growers and cannerymen in commencing proceedings before the railway commission immediately.

Vegetable growers of British Columbia, backed by the canning industry, appealed to the government in strong terms recently to rescue them from a threatened reduction in growing acreage, by about 50 per cent this year, by an immediate reduction in freight rates from here to prairie markets.

To this end a large delegation urged the cabinet to appoint counsel, and file an immediate application with the railway commission for a cut in western rates to the level of those prevailing from Ontario to the prairies.

It was expected the government would follow this plan and launch a new rate fight without delay.

Increase In Govt. Employees

Regina, Sask.—An increase of 351 in the number of employees in the various departments of the government over the number employed as at Sept. 9, 1929, is shown in a return to the cabinet of the assembly. This return includes the employees of the liquor board, the farm loans board and the power commission.

MAJORITY FOR LABOR ON TRADES DISPUTES BILL

London, England.—In a packed and excited House of Commons the government got through the second reading of the Trades Disputes Bill by a majority of 27.

The government majority was larger even than had been expected. Only seven other Liberals voted with Sir John Simon in opposition to the bill and with the Conservative opposition. One Liberal supported the bill by his vote; the rest abstained from recording their opinion.

As soon as the result of this vote was announced, Rt. Hon. Stanley Baldwin, Conservative chief, moved that the bill be referred to a committee of the whole House.

Again the House divided. This time, however, the majority of the Liberals voted with the government, and the MacDonald majority rose to 62. The net result is—in the parlance of Westminster—that the bill will go "upstairs" for committee consideration clause by clause. The committee stage will be passed in a standing committee instead of the committee of the whole where the possibility of a government defeat on a matter of detail is always present.

The final day's debate on the bill opened in breezy style with Rt. Hon. Winston Churchill on his feet. It ambled along with the contributions of back-benchers during the dinner period and ended snappily with Rt. Hon. J. H. Thomas, the secretary of state for the Dominions.

Mr. Churchill described the trades unions as pampered pets heaped with privileges under the new bill. The Laborites continually interrupted Mr. Churchill with ironical cheers. "Why," Mr. Churchill asked, in reference to Laborites, "why should a patriotic Conservative trades unionist have to subscribe to the political fund of the cosmopolitan Socialist? Why should a Catholic have to subscribe to a fund, perhaps, of an Agnostic or an Atheist?"

These words brought a Labor storm. "Filthy argument," one Laborite shouted.

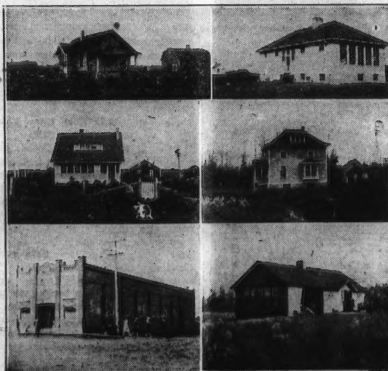

Mr. Churchill added, they might not dislike it much in the House of Commons, but they were going to hate it like poison "upstairs."

Mr. Churchill finished by comparing Prime Minister MacDonald with the "boresome wonder" of a circus.

The Liberals had compromised on the bill, Mr. Churchill added, they might not dislike it much in the House of Commons, but they were going to hate it like poison "upstairs."

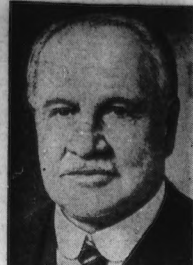

A new law makes compulsory the establishment of a public library in every municipality of Czechoslovakia.

Winning Alberta Communities in C.N.R. Progress Contests

Announcement of the first year's results in the Canadian National Railway community progress competitions for European settlements in Alberta, showed Norma Ukrainian community near Vegreville to be first, Lloyd-George Scandinavian community near Camrose second, The Pines Ukrainian settlement at Mundare third, Liberty Municipality near Leduc fourth, and Unity Municipality near Redway fifth. Pictures show left to right, farm home of J. Frederus near Vegreville, Brookside school near Vegreville, farm home of Frank Mohler in Lloyd-George district, farm home of S. W. Shenkel in Liberty, the community hall in the Ukrainian settlement at Mundare, and the Clifford school in Unity Municipality.

PROMINENT CANADIAN BANKER

Sir John Aldred, president of Canadian Bankers' Association, which held a general meeting of executives in magnificent new building at Toronto, the highest in the British Empire, which will now be open to public prior to official opening ceremony.

Precedence Given To High Commissioners

King Gives Order As To Rank On Ceremonial Occasions

London, England.—Office of the secretary of state for the Dominions announces that His Majesty has directed that the high commissioners of the Dominions in London and also the high commissioners for India, will rank immediately after the British secretaries of state on all ceremonial occasions other than those when ministers of the crown are present from the Dominions.

This announcement implements the decision reached at the Imperial Conference regarding the precedence to be accorded to the high commissioners.

Position of the Dominion's representative, in relation to a minister of the crown visiting the United Kingdom from the Dominion remain unaltered, the minister being given precedence immediately before the high commissioner concerned.

Heads Canadian Flying Club

Manager Of Royal Bank At Fort William Elected President

Montreal, Que.—H. R. Richards, manager of the Royal Bank of Canada in Fort William, Ont., was elected president of the Canadian Flying Club Association at the close of the annual convention here. He succeeds J. A. Sully, of Winnipeg. Other officers were elected as follows: Vice-president for the Maritime provinces; J. R. Nelson, manager of the Halifax Shipyard, Halifax, N.S.; vice-president representing Ontario and Quebec; A. Sidney Dawes, Montreal; vice-president, representing the western provinces, James A. Bell, president of the Edmonton Flying Club, Edmonton, Alta.; treasurer, H. P. Crabb, Winnipeg, president of the Winnipeg Flying Club.

All meetings of the association were held in camera and no public announcements were made at the close, beyond the list of officers.

Passengers Ordered Deported

Britishers On C.F.R. Ship Barred From Landing In Canada

Vancouver, B.C.—Two passengers off the liner "Empress of Russia," which arrived here from the Orient, Captain W. Little and L. Mercer, have been ordered deported by an immigration board of inquiry. Appeals have been lodged in Ottawa against the rulings.

Captain Little was just discharged from the Indian army and was on his way to join relatives in Toronto. Mercer, from Shanghai, an engineer of the steamer "Hedwig," which was wrecked a few months ago off China, said he intended to settle in Canada.

The deportations were ordered under the government regulation which bars all but practical farmers and wives of bona-fide Canadian residents from entering the country.

Mining Men To Meet

Delegates From All Parts Of Canada And U.S. To Attend

Ottawa, Ont.—Delegates from all parts of Canada and some from United States are expected to attend the annual meeting of the Canadian Institute of Mining and Metallurgy from March 4 to 6. Papers on the latest developments in Canada's mining industry will be delivered and many social functions have been arranged. G. G. Dauncey will present a paper on exploration work in the north-west territories, particularly around the Coppermine River; J. P. Nome will refer to developments around Great Bear Lake and John Dryburgh will speak on the nickeliferous ores of the west coast of Hudson Bay.

TEST SHIPMENTS OF GRAIN FROM PORT CHURCHILL

Ottawa, Ont.—Test movement of two or possibly three cargoes of grain, about 750,000 bushels, will be shipped through the port of Churchill the middle of next September, according to present plans. A conference held here with representatives of shipping interests indicated that there will be no difficulty getting private steamship companies to undertake the movement. A statement issued on the conference by the Department of Railways and Canals, follows:

"Arrangements for the proposed test movement of grain from the port of Churchill, on Hudson Bay, were under consideration at a conference held in the office of the minister of railways and canals. The meeting was arranged at the instance of the minister, Hon. Dr. R. J. Manion, who is taking a warm personal interest in the whole undertaking, and was attended by the principal officers of his department and by representatives of Canadian Government Merchant Marine, and Canadian National Steamships.

"Dr. Manion was assured by his officers that from present indications the port facilities would be sufficiently advanced to admit of the first movement by about the middle of September, the date by which the contractors of the elevators have agreed to have them complete. The movement will dislocate to a certain extent the dredging and dock extension program for the present season, and for that reason will probably be restricted to the shipment of two or possibly three, cargoes of grain approximating about three-quarters of a million bushels.

"The shipping trade is greatly depressed at present, and from inquiries already received, vessel owners are evincing considerable interest in the possibilities of the Hudson Bay route. No great difficulty, therefore, is anticipated in interesting private vessel owners in the business that the test movement will afford and considerable prestige may be expected to accrue to the steamship company having the honor of handling this first commercial movement of grain out of Western Canada's new port.

"It is too early as yet to speak definitely as to either freight or insurance rates, but arrangements are being made to see that that aspect of the situation is thoroughly canvassed, and at the proper time the minister expects to be in a position to meet any eventually which may develop. He trusts both the ship and the officials of the department feel that there is no question but that it will be possible to demonstrate, this coming fall, that the facilities of the port will be available and capable of taking care of the business which will be attracted to the port on the inauguration of the route at the opening of the 1932 season of navigation."

SAYS CANADIAN WHEAT IS BEST IN THE WORLD

Toronto, Ont.—"Now is the time for the governments to stock up with better seed than this year's crop, wheat that will fight rust or anything but drought," said Herman Treile, of Peace River, Alberta, world's wheat king, in an interview here. He addressed the Kiwanis Club here on his way to Ottawa to consult with officials of the Department of Agriculture.

Mr. Treile confessed that he is interested in seed wheat, in supplying the Canadian farmer the best possible wheat and oats, rather than in the economics of the agricultural problem. "The trouble with Canadian wheat is there are too many varieties," he remarked. "This country does not produce the best wheat for mixing that the world requires for flour. I'm not interested in bulk wheat—that will come in the Peace River as it has in other parts of the west. My job is to produce better and better seed."

"Canadian wheat is the best in the world," Mr. Treile went on. "The world needs the best. Get Canada's quality wheat advertised enough and we don't need to worry about getting rid of our product—without feeding No. 1 Hard to the hogs, which at present relative prices of wheat and pork is a better programme than selling it at less than 80 cents a bushel."

Russia could not produce as good super-hard wheat as Canada, Treile said, "they have the climate and the soil, but not the organization," he explained, "they are using our brains and our experience."

Ottawa, Ont.—Prestige of Canadian grain on world markets must be regained before the troubles of the western farmer can be cured, said Herman Treile, of Wembley, Alberta, world's wheat king.

Mr. Treile, who with Mrs. Treile is leaving in a few days on a trip overseas, called on Dr. J. H. Grideau, deputy minister of agriculture, and emphasized the need of concentrating on Marquis and earlier types of wheat.

"The difficulty of the west," Mr. Treile said in an interview, "is that the farmer has been trying to accommodate the combine harvesters to the wheat instead of growing a type of wheat suited to the combine."

"Farmers have been using the combine for a mob harvest, and the wheat which is not dry when threshed and the effect has been to destroy the prestige of our grain."

As to this year's crop, Mr. Treile said: "The farmer will take what he can get for it and then start all over again."

Mob Lynchers Slayer

North Dakota Is Scene Of Lawless Tragedy

Schafer, N.D.—Reverting to the days before law and order came to the west, a mob battered its way into the county jail here and lynched a 22-year-old farmer, who had confessed slaying a family of six.

When the crowd dispersed, as swiftly, and as silently as it had formed, the body of Charles E. Haven, youthful slayer of the A. E. Haven family, was left hanging from a bridge over Cherry Creek, about a quarter of a mile from town. His neck was broken.

Apparently the mob came from nearby farms that once were a part of the great cattle country about 60 miles north of Medora. None of the mob was recognized.

It was the 12th lynching in the history of the state, eight while men, three Indians and a negro having fallen victims to mobs previously. The last such affair occurred 17 years ago, when Steve Culbertson, a triple slayer, was taken from jail at Williston and his body left suspended from a nearby railroad bridge.

Young Bannon died pleading that his father, James F. Bannon, also held for the killings, be not harmed. The youth, in his confession, had declared that he alone was responsible for the Haven family's massacre, which, he said, occurred after a quarrel last February.

Russian Trade Delegations

London, England.—Rt. Hon. Arthur Henderson, secretary of foreign affairs, informed a questioner in House of Commons that he was not aware of any negotiations looking to the establishment of Russian trade delegations in any of the Dominions.

The central highway in Cuba is to be completed in February.

Britain May Have State Farms

Minister of Agriculture Believes It Will Help To Solve Unemployment Problem

John Bull may soon be Farmer John instead.

State farming is being pushed in Parliament by Dr. Christopher Addison, Minister of Agriculture, as a partial cure for England's unemployment and farm problems.

Thus far his measure has had support indicating its final passage. The plan, in reality, is a complete reorganization of England's agriculture. It has three main objects: large scale mechanized farming, the reconditioning of land and the settlement of unemployed persons on it.

More than 1,000,000 acres of arable land has gone out of cultivation in England in the last few years, according to Dr. Addison—a serious threat for an island which in a month can produce only enough to feed itself for one week.

Briefly, the large farms will be demonstration tracts, where modern mechanical farm methods, such as commonly practiced in America, will be taught, and large-scale farming encouraged.

Not more than fifty of these are contemplated. Here farmers and even city-bred workers can be trained.

These demonstration farms are to be purchased and held by the ministry of agriculture, but controlled and managed by local authorities, universities and agricultural colleges. The ministry, too, will have power to purchase neglected land by compulsion, to decide whether land has been neglected and to obtain agreement from land upon which reclamation work is necessary. Thereafter the ministry is to have power to let or sell the land.

Most of the unemployed, however, are not to be put on large farms, but allotted tracts not larger than an acre.

Cottages are to be provided where needed, seed, fertilizer and machinery supplied and the new farmers financed to a certain extent.

The bill gives the minister power to make loans to tenant for the purchase of stock, feed, fruit trees and other necessities of a farm.

About \$33,000,000 is asked to finance the scheme.

Had Some Narrow Escapes

Earl Jellicoe Near Death Three Times At Outset Of His Career

Earl Jellicoe, Commander-in-Chief of the Grand Fleet at Jutland, who was 71 recently, had three extremely narrow escapes from death at the outset of his career. When a midshipman on a naval boat in which he was going to the assistance of a wrecked oil barge, he was capsized by heavy seas, and he had to swim some miles to shore. He was lying ill in his cabin on the ill-fated "Victoria" when she was rammed by the "Camperdown," and was saved only by the gallantry of a fellow-officer. And during the Boxer Rebellion in China he was shot through the lungs, and though believed to be dying, had to lead his men in a running fight to safety which lasted five days.

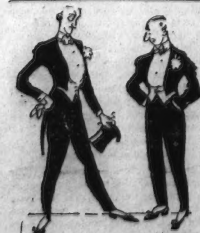

Space For Commercial Exhibits

A limited space at the World's Grain Exhibition and Conference at Regina in 1922, will be reserved for commercial exhibits. It is announced, providing that such exhibits reflect their relationship to agriculture, especially to that department of the industry relating to the production of feed crops.

The President of Mexico is to receive his salary in silver.

More than 74,000 automobiles were registered in Mexico in 1920.

Norway now has 300 movie theaters.

"Women are like collars. It is not until you get them round your neck that you can tell if they are big they are." —Nagel's Ludwig, Berlin.

W. N. U. 1876

A Descriptive Essay

Minnesota Student's Idea Of What a Cow Is

The following illuminating essay on the subject, "What Is a Cow?" published in the St. James Record, Collegeville, Minn., is attributed to Whitford Ladowese, a student at that school:

"The cow is a female quadruped with an alto voice and a countenance in which there is no guile. She collaborates with the pump in the production of a liquid called milk, provides the filler for hash, sausages and similar objects, and at last is skinned by those she has benefited, as mortals commonly are.

"The young cow is called a calf and is used in the manufacture of chicken salad, breaded veal and other uses of which no further knowledge is necessary.

"The cow's tail is mounted at and has a universal joint. It is used to disturb marauding flies and theassel on the end has unique educational value. Persons who come in contact with the assel have vocalaries of peculiar and impressive force.

"The cow has two stomachs. The one on the ground floor is used as a warehouse and has no open function. When this one is filled, the cow retires to a quiet spot where her bad manners will occasion no comment. The raw material thus conveyed for the second time to the interior of her is pulverized and delivered to the auxiliary stomach, where it is converted into cow.

"The cow has no upper plate. All of her teeth are parked in the lower part of her face. This arrangement was perfected by an efficiency expert to keep her from gumming things up. As a result she bites up and gums down."

Yellow Pine Seed

Tons Of Seed From British Columbia For Afforestation Purposes

Three and a half tons of yellow pine seed and nearly one and a half tons of Sitka spruce seed were extracted at the New Westminster, B.C. seed extraction plant for forest tree seed, which is maintained by the Forest Service of the Department of the Interior. These quantities would mean, respectively, about fifty-six million (56,000,000) individual seeds of yellow pine and over eight hundred million (800,000,000) seeds of Sitka spruce. Nearly three hundred pounds of Douglas fir seed were extracted and smaller quantities of lodgepole pine, Western white pine, lowland fir, and caskara. The greater part of this seed is taken by the British Forestry Commission for use in connection with the large afforestation schemes being carried on in Great Britain and by the Government of New Zealand for its plantations.

Sun Rays For Hens

Artificial Sunlight Produces Surprising Results In German Experiment

A new use for artificial sunlight and ultraviolet rays has been discovered in Germany, and suggests pleasant visions of fatter chickens and bigger and better eggs.

A nest of eggs was exposed to these life-giving rays for a few minutes morning and evening, with surprising results. The chicks passed their way through with vigor and enthusiasm into the world long before the appointed time, and after a few days' further treatment were strutting round the farmyard regarding their unmyriad and undersized fellows with ill-concealed contempt.

Even the unwelcome cockerels put on such weight that they turned the scale at nearly five pounds after four months and brought a handsome profit.

Reasoning True To Form

The vicar's friend has been discovered by the husband's parishioners. "Good morning, Mrs. Higgins," she said gushingly. "How is your son getting on in the films at Hollywood?"

"Very well, ma'am," said the boy's mother. "Does he ever come home and see you now?" asked the vicar's wife.

"Every summer he comes home," said Mrs. Higgins proudly. "Every single summer of the five years he's been gone."

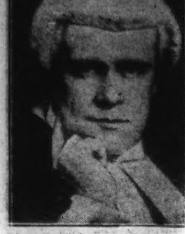

"And I suppose he brings his wife with him each time?" the other continued.

"Why, yes," supplied the fond mother. "And they was five as pretty girls as you ever laid eyes on."

An Aberdeen lady was suggesting to her husband that it was time she possessed a motor-car. "Na, na," he replied, "ye'll just be content with the splendid carriage nature has given ye."

"I know that. That is why I am so sad." —Buen Humor, Madrid.

LORD CHANCELLOR

Lord Sankey, Lord Chancellor of England, chairman of Indian round table conference, who recently announced outline of constitution under which India will govern herself, has been chosen one of arbitrators in Hindu-Muslim dispute. —Copyright by Acme Newspictures.

Law Should Be Changed

Government Likely To Look Into Matter Of Canadian Citizenship Of British-Born

An Ottawa despatch indicates that the question of the Canadian citizenship of British-born people residing in the Dominion is likely to be the subject of inquiry and of legislation at the coming session of the Dominion Parliament.

The cases of deportation that aroused so much indignation through the land some months ago brought before the public some of the anomalies in the law relating to the Canadian citizenship of British-born in the British Isles. These cases showed clearly that length of residence in this country makes absolutely no difference to the status of an Englishman or Scotchman or Irishman. If for any reason he offends and comes under the displeasure of the authorities, he is liable to deportation.

A man born in Galicia and becoming naturalized in Canada after five years' residence is safe to enjoy to the end the privileges of Canadian citizenship and cannot be deported. Obviously something is wrong here and if the Government takes the matter under consideration and introduces a bill to change this condition of affairs, they should have the support of men of goodwill of all parties. —Regina Leader-Post (Evening).

Ugliness and Beauty

Are Within Control Of Every Person Says English Doctor

Dr. Josiah Oldfield thinks that all ugly women should be drowned. This opinion he expressed in a lecture to the Women's Institute at Newbury, Berkshire, England, and the fact that a riot did not follow suggests that his audience must have been unusually lovely—or generously endowed with a capacity for self-deception.

"Ugliness and Beauty," says Dr. Oldfield, "are so much within the control of every individual that for a woman to create a repellent face is a voluntary crime against society."

But what of men? If beauty is within the control of every individual there are many roads of creation walking the earth who should be dealt with by the Lord High Marine Executioner whom Dr. Oldfield would doubtless like to see appointed.

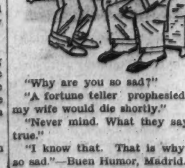

Could Put In Time

A Scotsman had accidentally fallen into his own well, and his wife went running over to ask:

"What time is it?" inquired the Scotsman.

"Eleven-thirty," replied his wife. "Don't bother," the Scotsman shouted up to her, "I'll swim around 'till noon."

Only one gold mine is now being operated in Nicaragua.

"Why are you so sad?" "A fortune teller prophesied that my wife would die shortly."

"Never mind. What they say isn't true."

"I know that. That is why I am so sad." —Buen Humor, Madrid.

Clean Teeth Never Decay

The Mouth Is An Ideal Place For Bristling Bacteria

(By John Burke Taggart.)

Which are more important, your teeth or your diaries?

It is not necessary to write this newspaper and assure the writer that the above is a foolish question. He already knows it is a foolish question—but it is addressed for the most part to foolish people. After every meal their mouthful human beings wash their dishes. If they don't wash them after every meal they at least wash them before using them again. Yet even after the enormous amount of educational work that has been undertaken in the schools and outside of them to induce people to take decent care of their teeth, I venture to say that a very small percentage of Canadians clean their teeth three times a day—once after every meal. In other words Canadians are much cleaner with their dishes than they are with their teeth, and much more sanely about their crockery, than about their mouthful human beings.

"Oh, but," I can hear someone object, "the dishes are dirty after being used. You can see that. One's mouth on the other hand is clean."

It is? The dishes are dirty and you can see it. Your teeth are dirty and you can't see it. How dangerously unclean one's teeth and mouth may be without one's knowledge may be illustrated by the statement of Sir William Hunter, distinguished physician of Charing Cross Hospital, London, England, who says that if mouth infection could be entirely overcome the other avenues by which infection gets into the human body could safely be ignored.

The mouth is an ideal place for bacteria, and because of its warmth and moisture fosters growth much in the same manner as an incubator does, and harbours germs which may cause a general poisoning of the system or create poisons which may be carried to some part of the body and cause trouble there. Undoubtedly some types of heart disease, kidney disease, diseases of the gall bladder, appendicitis, pernicious anemia, rheumatism, neuritis, diseases of the eye, and a host of troubles of the nervous system may be started by unhealthy mouth conditions. Certainly that is a very amazing list of diseases and physical troubles.

Now how do teeth decay? The two main causes are lack of proper food and the attack of germs. We know how to handle germs. We know that we must keep our teeth clean by keeping our mouths scrupulously clean. Now how about diet and this part if plays? The time to begin arranging a human being's diet is when his teeth are good is incredible as it may sound, some months before he is born. In fact doctors agree that two periods in which food most strongly influences the development of the teeth are the few months before the child is born and the first two years of the child's life. It is obvious that what the expectant mother eats is the all-important factor in making or marring the child's teeth in the first several years ago Professor Parks, of Yale, made the assertion that if pregnant women observed the following rules, rickets and dental caries in children would no longer exist:

1. The expectant mother's diet should include one quart milk, butter and liberal portions of green vegetables.

2. She should spend several hours in outdoor exercises, preferably walking.

3. She should take sun baths on warm days.

Now, week's health article will deal with the proper way to clean and to exercise the teeth.

Returned To Japan

Temple Bell Was Sold Fifty Years Ago By Dishonest Priest

After it had been exhibited in a foreign land for fifty years, a huge temple bell of Japan, secretly sold by a dishonest priest, was recently returned to Tokyo. The bell was cast at Sanjo, Kyoto, about 300 years ago through funds collected from pious Buddhists, and it was later brought to the Mingwang temple in the Japanese capital. It hung there until fifty years ago, when it was sold by a temple official. Recently the bell was discovered in a museum in Sweden by T. Ishimaru, a commissioner of the educational affairs, and was subsequently returned to Japan.

Canada's Pulp and Paper Industry

The pulp and paper industry is the most important manufacturing industry in Canada, heading the lists in 1920 for gross and net values of manufactured products, as well as for distribution of wages and salaries.

Competent authorities accept the view that birds' feathers have been derived from reptilian scales.

Progress In British Columbia

Kelowna Boards Have Largest Canning Plant In Canada

More progress in 1920 than ever before is reported by most of the cities, towns and villages in the interior of British Columbia, while other centres have held their own as compared with 1919. Prince Rupert, Massett, Pouce Coupe, Vanderhoof, Powell River have witnessed more expansion than in any previous year. In the Okanagan Valley Kelowna has been at least on a par with 1919 and tax collections have been more than 90 per cent, in many fruit centres. The dehydrating plant in Vernon has doubled its payroll; Kelowna has now the biggest fruit and vegetable canning factory in Canada; Penticton has held steady and Oliver has gone forward. Construction work in the Kootenays has more than made up for lower metal prices and in scores of small centres that lived entirely on logging, mixed farming is now flourishing. A hundred new settlers near Prince George are making a wilderness into a cow-tyranny and new settlements are developing in the Cariboo. New homes are arising as a result of coal mining activity and highway construction in several centres. Revelstoke and Cranbrook have advanced notably while Kamloops is holding its own and Ashcroft has had the biggest cannery year in its history.

Farming Has Changed

Past Fifty Years Has Completely Changed Farming Profession

Some appreciation of the change which has taken place in farming in Canada during the past fifty years is afforded by the observations made on a recent occasion by Dr. J. F. Booth, Commissioner of Agricultural Economics, Ottawa. In the early days of Canadian agricultural history, he pointed out, the farmer was a self-sufficient producer, and in a small way a manufacturer. Today the farmer depends for existence upon his ability to produce commodities for market. He is no longer a technician who produces his own food and manufactures his own shoes, clothing, etc., but instead is a business man who is dependent upon a knowledge of book-keeping, production problems and the intricacies of domestic and foreign trade and commerce—he must have some appreciation of the gradings involved in the assembling, grading, transportation, storage, marketing and marketing of his products.

New Wheat Variety

Kansas City Plant Breeder Believes He Has Evolved Good Type

A wheat variety which he hopes will serve equally three masters—farmer, miller and baker—has been submitted to a jury of experts by Dr. John Parker, United States Department of Agriculture plant breeding expert. It is the fruit of 14 years of research.

A jury consisting of 30 milling and baking experts assembled at Kansas City to test flour from Dr. Parker's new hard wheat. They tested bread, too, baked from the flour. Their report will be forthcoming later.

No seed of the new variety is ready for distribution. Dr. Parker said, stating that he was during the tests were Dr. C. O. Swanson, head of the milling department of the Kansas State Agriculture College, and H. M. Baines, director of the Southwest Wheat Improvement Association.

Larger Type Pays Better

Size Is Important Factor In Dairy Cow Selection

A study of nearly 220,000 yearly individual records of cows in dairy-herd improvement associations showed that within the breed the heavier cows in general excited the lighter cows of the same age in production and income above feed cost.

The larger cows are more in dollars' worth of feed per cow than the smaller cows, but they more than paid in production for the increased cost of feed.

Size of cow is only one of the factors that influence production and income above feed cost; it is not wise, therefore, to buy dairy cows on the basis of size alone. It is true, however, as a general rule two cows are equal in other respects the larger cow may be expected to produce more milk and return a larger income.

An Old Invention

The automatic slot machine was probably invented about 200 B.C. Egyptian worshippers entering temples dropped money in a box and automatically received purifying water in return.

Back in the days of the Hudson's bay Company, a wild silver fox pelt brought the round sum of \$1,000.

Worth More Attention

Man Who Eats Breakfast Properly Starts Day Right

Stanley Baldwin who used to be Prime Minister of England, remarked the other day that breakfast is the finest meal of the whole day; and since nothing is more pleasant than talking about meals, we might just as well go into that topic right now. "I always enjoy my breakfast," says Mr. Baldwin. "I find it the most pleasant meal of the day. I am getting to be an old man now, but I still come down to breakfast every morning feeling full of great hope, faith and cheer. By lunch time I have lost a great deal of it, and by evening I am nearly giving up all hope for this world or the next."

All of this, of course, proves nothing except that Mr. Baldwin does very well by himself at the breakfast table; but it does call to mind the fact that most Canadians treat their breakfasts in a most unpardonable manner. Breakfast ought to be an event; it ought, as it is with Mr. Baldwin, to be an occasion of hope, faith and cheer; but for most of us it is hardly so much as an incident.

The chief trouble, probably, is that few of us come to the table fully awake. The city man lies abed until the last minute; then he stumbles to his feet, shaves and dresses in a fumbling sort of way, and comes to the dining room with his tie and mummled piteously. Fighting to get out of the grip of Morpheus, he gulps down his coffee and bolts his food like an automaton, and his breakfast is in him before he really knows that he is eating.

The farmer knows better. He generally does an hour or so of hard work before he goes to breakfast, so he is not only wide awake, but he has worked up a good appetite. And then, well, he leisurely takes a bowl of oatmeal, some eggs and sausage and fried potatoes, a few griddle cakes, a doughnut or two and a couple of cups of coffee; and by the time he is through he can face the agricultural depression with a clear conscience.

Of course, such a breakfast would land the average city man in the hospital in short order. Nevertheless, the farmer has the right idea. Breakfast, to him, is something to be looked forward to—whereas for most of us it is just something to be got through with.—Vancouver Sun.

Predicts Export Of Butter To Britain

Canada Should Have National Trademark Says Dairy Official

Within two years Canada should be exporting butter to the British market, E. N. Robinson, president of the National Dairy Council, told the Dairyman's Association of Nova Scotia at their annual banquet in Halifax.

Mr. Robinson emphasized the importance of developing a uniform creamery grading system for all Canada and creation of a national trademark for Canadian butter. The increased tariff on New Zealand butter, said Mr. Robinson, had greatly benefited the Canadian dairy business, which he termed "Canada's \$300,000,000 industry."

The Explanation

Sweet Thing—Wery you ever in love?

Old Bachelor (warily).—"Yes, but I had too much intelligence to marry the girl before she had reached the age of discretion."

Sweet Thing—"I see. And, of course, when she reached it she wouldn't have you."

Southern Alberta Sugar Beets

Fully 35,000 acres of ground have been prepared for the next season's sugar beet crop, according to Brig. Gen. J. S. Stewart, M.P., who sees a great future for the industry in Southern Alberta where the soil and climate are peculiarly suitable.

"I have an idea which is worth millions."

"What do you want for it?"

"Five marks." — Die Munkeln, Vienna.

Canada Has Taken Adequate Measures For The Protection And Propagation Of Game

The early history of Canada, its exploration and development, is very closely woven with the story of the wild life of the country. The fur was the lure which led the early traders and adventurers to penetrate the interior of the country and the game provided a means of sustenance, not only to the traders and explorers, but also in a large measure to the early colonists.

In those early days every species of game native to the North American continent, including buffalo, elk, antelope, moose, deer, caribou, muskox, mountain sheep, mountain goat, beaver, wolves, cougars and other small game and fur-bearing animals, as well as game birds of all varieties, were plentiful everywhere within their native range throughout Canada. Owing, however, to the advance of settlement and other contributing factors of civilization the vast supply of game became greatly depleted; in fact, certain species such as the buffalo, elk, antelope, and muskox were in serious danger of total extermination.

Happily, however, the situation has been met by the Federal and Provincial Governments of Canada, and means have been taken to protect and conserve all useful species of wild life. The provincial authorities drafted laws conserving the game and at the same time reserved areas for their complete protection.

The Federal Government's contribution to the cause of game protection includes the establishment of its reserves in the Northwest Territories and the Province of Alberta, with an area of 546,857 square miles; 43 bird sanctuaries with an approximate area of 1,000 square miles in which the birds receive absolute protection throughout the year; 51 public shooting grounds with an area of 700 square miles, where birds receive protection during the nesting and rearing period, and the absolute protection of all game, fur-bearing animals, and birds in the eighteen great National Parks, having an approximate area of over 12,000 square miles.

As these parks and reserves are located in practically every province in Canada all animals and birds are propagated upon their natural range and every species of Canadian wildlife has been saved to posterity. In fact, certain species which are not native to Canada have been introduced successfully and add materially to the value of the country's wild life.

Canada welcomes sportsmen to share in her plentiful supply of game and so vast are her hunting districts and so diversified are the conditions that the hunter, no matter what his preference, is sure to be satisfied. The entire Dominion is opened up by highways, railways, steamship or air line so that the sportsman is conveyed in comfort to his "going-in" point. At established points he will find accommodation and also outfitters who are prepared to furnish guides, canoes, camping equipment, pack trains and everything necessary for a trip through the country in which he decides to hunt.

Braille Books Circulated
A sidelight on one of the most interesting activities of the Canadian National Institute for the Blind was given at a recent meeting of the directors. It was stated 2,003 volumes in Braille or raised type, had been circulated by the institute's library in October, throughout Canada and in parts of the United States, and even in Mexico. The circulation was 800 volumes greater than in October, 1929.

Natural Gas Consumption
The consumption of natural gas in Canada during 1929 for domestic purposes was calculated to be sufficient to displace 440,000 tons of coal. Natural gas is found in abundance in Alberta and in some parts of Western Ontario.

Hungary is increasing all inland postal rates.

"If you wish to get slim, you must take nothing but a few drops of water a day."
"Musture or after meals?"—Esquels, Barcelona.

The Weak Link

Lowering Production Costs On Farm Is Necessary

"If there is one weak link in the chain of farm operation today it is in the well-considered production of farm feeds, home grown, produced at cost," asserts G. B. Rothwell, Dominion Animal Husbandman, Department of Agriculture, Ottawa. In the final analysis the low cost unit production is largely the reason for high cost milk, admitting all the imperfections and low average production of our cows. The farmer's one and only salvation today is in lowering production costs under his control, i.e., on his farm.

Alberta Creameries

Receipts For Eleven Months Reach Total Of 14,452,063 Pounds

Receipts of cream in Alberta creameries were more than 40 per cent. greater during November than during the same month of the previous year, the figures being 811,496 pounds of butter fat as against 575,186 pounds, according to C. P. Mackay, dairy commissioner. Receipts for the eleven months reached 14,452,063 pounds, an increase of about ten per cent. over the corresponding previous eleven month period.

7309

LOVELY NEW SPORTSWEAR

All Tingy models are created and sketched in Paris and the patterns are made in New York. Figue is such a fresh addition to the tweed frock. It has a way of becoming styled easily, however—and goodbye chic! The busy woman—who among us is not busy—can therefore only hope for such touches on her frock to be easily removable for laundering.

Note today's model and how extremely easily the pique bow can be reconditioned. The front, broader one is a straight strip, bowed and passed through one slot and the closure as shown. On the sleeves narrower stripes are similarly passed through two slots. You will note they decorate the upper arm an area of the newest Paris dresses that has suddenly assumed much importance. This pattern may be obtained in size 14 to 20 and 24. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Dollar Wheat

Livestock Used As A Medium For Marketing Grain At Fair Prices

Most people today think Dollar Wheat a thing of the past. But this is not necessarily the case when livestock is used as a medium for the marketing of this essential grain. Values as high as five dollars per bushel when fed to hogs and sold in the form of eggs on the winter market are claimed by feeding experts. But particularly timely and interesting is the finding of the Dominion Experimental Station at Lacombe, Alta., which places per bushel value of wheat at the following figures:

With Pork	Wheat fed	Barley fed
Selling	Pigs in	Pigs in
at	worth	worth
12c. per lb.	\$1.48 per bu.	\$1.09 per bu.
11c. " "	1.25 " "	99 " "
10c. " "	1.00 " "	79 " "
9c. " "	1.09 " "	70 " "
8c. " "	96 " "	60 " "
7c. " "	85 " "	60 " "

Radio On the Farm

More Important On the Farm Than Any Other Place

"Information can be just as pleasant as entertainment," asserted Dr. J. H. Grisdale, Federal Deputy Minister of Agriculture, speaking at Ottawa recently. "The radio is important to agriculture. The young people are becoming daily more important on the farm and they want radio entertainment. Radio provides this; it keeps the farmer in touch with the market situation and weather conditions, and it also keeps him in touch with the news of local and world happenings. I think radio is more important in the farm home than in any other home, it brings the world to the front door."

Back To The Farm

Keen Interest Is Evidenced By Farmers In Broad Sow Policy

A new significance attaches to the old familiar slogan "Back to the Farm" in the way of the Broad Sow Policy enumerated by the Hon. R. Weir, Federal Minister of Agriculture, at the Royal Winter Fair, in working out. In the first month in full operation over five hundred sow of the select bacon type have been saved from slaughter, bred, and sent back to farms. Saskatchewan and Alberta lead in the number of orders placed but keen interest is evidenced all over Canada. Sows of suitable type are provided farmers at cost, with a further saving of one-half the cost of freight from the stockyard to the buyer's farm.

Byng Not Resigning

Lord Byng, former governor-general of Canada and present head of Scotland Yard, is understood to have denied that he will resign as chief commissioner of the London Metropolitan Police. Lord Byng has been absent, through illness, from his post for many months.

She: "Now what are you stopping for?"
He (as car comes to halt): "I've lost my bearings."
"Well, at least you are original. Most fellows run out of gas."

KING CAROL AND YOUNG SON

Above is an interesting photograph coming from Sinala, Roumania, showing King Carol and his young son, Prince Michael, and former boyking, all set for a hike on skis through snow-covered mountains of that district.

HOME UNDER POLICE GUARD

Judge Emerson Coatsworth, senior police magistrate and the acting chairman of the board of police commissioners at Toronto, whose home is under police guard following a mysterious threat over the telephone to burn it down.

Cod Liver Oil For Poultry

Suitable In Crude State and Is Not Expensive

An abundant supply of Vitamin D is required to keep laying hens producing and healthy during the long winter months when they are shut in. It is the presence of this vitamin which assists assimilation of the minerals calcium and phosphorus in the production of eggs and egg-shells. As the value of cod liver oil for poultry feeding depends entirely on its vitamin content only reliably tested brands should be used. Crude cod liver oil is suitable for poultry and is not expensive. In the dry month feed one pint of oil to each one hundred pounds of mash is a good ration, while with a wet mash or other feed one to two teaspoons to each twelve birds has been found adequate—Dominion Experimental Farm Note.

New Signs Suggested

A Houston (Texas) man declares that danger signs at railroad crossings are based on the wrong psychology. He says, tell a man to "Stop, Look and Listen," and he is impelled to do none of the three. He suggests for railroad crossings:

"Don't stop. Nobody will miss you."
"Take a chance. You can get hit by a train only once."

British Industries For Canada

A Birmingham steel manufacturing firm has decided to open branch works in Canada, probably Quebec. A Leicester textile firm and another Birmingham organization in the engineering trade are also seriously considering similar steps, while many other firms have made enquiries.

Miniature gasoline pumps, fitted with lead pencils, have appeared as desk decorations in Europe.

The King of Spain will sell his race horses.

Government Radio Stations Broadcast Programs To Inhabitants Of Far North

Information About Eggs

Eggs Are Rich In Proteins, Vitamins and Minerals

Two tons of grain will produce 480 dozen of eggs. So is grain at a price of \$1 per cwt. it would be worth \$40. \$40 as eggs at 25 cents per dozen it would be worth \$120. An egg is 60 per cent. water, 13 per cent. protein, 10 per cent. fat and 11 per cent. lime or ash. In an egg 60 per cent. is white, 30 per cent. yolk, and 10 per cent. shell. The best eggs of the year are those laid in the months of April, May and June.

An egg eaten between September and March is worth more to the average person in a northern climate than one eaten between April and August. Eggs and milk together are liquid meat in the most digestive and assimilable form.

An egg weighing two ounces holds approximately 70 calories in fuel value.

The egg is aptly termed "bottled sunshine." It is rich in proteins, vitamins and minerals. Of the five vitamins the egg supplies Vitamins A, B, D and E. It is particularly rich in "D" the sunshine vitamin—Department of Agriculture, Ottawa.

Douglas Fir Stands Test

Great Britain Pronounces Railway Ties From B.C. Satisfactory

Last summer a consignment of Douglas fir railway ties was forwarded to Great Britain for experimental purposes and subjected to exacting tests by the Forest Products Laboratories in London, England. These were of a thoroughly practical character and resulted in their being declared highly satisfactory. As one of the first consequences the representative of the British Columbia Government in London, England, has been approached concerning another shipment of about 300,000 of these ties.

Railway managements of the consolidated systems into which the British roads are now divided are said to have been keenly interested in the tests and if prices are satisfactory more large orders may follow. The total requirements are immense but the Pacific coast has equally vast resources. Douglas fir from which they can be filled without difficulty. Millions, indeed, can be supplied, whenever needed, to the advantage of both parties.

Don't Overfeed

Bacon Type Of Hog Which Brings Money To The Producer

With an abundance of low priced coarse grains and wheat available there is an apparent tendency on the part of farmers to overfeed their market hogs. This is shown by the increase in the average weight of hogs now coming onto the market. The two hundred pound hog is the ideal market weight. A. A. MacMillan, Chief of the Sheep and Swine Division of the Federal Department of Agriculture, points out. With the price of land what it is today, relatively lower than the price of bacon, it is the bacon type which means money to the producer. Farmers should watch hog feeding closely to guard against both light weight and excess fat—he must keep away from the out-weight grades if he is going to get the top of the market for his hogs.

Seed Production

Thousands Of Bushels Of Registered Seed Produced In The Maritime Provinces

The objective of the seed production policy of the Federal Department of Agriculture is a suitable and continuous supply for Canadian farmers through conveniently localized production. Digby and Yarmouth counties in Nova Scotia have produced 1,700 pounds of registered and 2,500 pounds of commercial turnip seed for 1930; many thousands of bushels of registered seed oats have been produced in the Maritime provinces, together with considerable quantities of registered seed wheat and barley; while Prince Edward Island and New Brunswick have districts in which seed of a particularly high quality is available for Maritime supply during the 1931 crop year.

Mechanical Egg Sorter

Five persons can sort and candle 60,000 eggs a day with the aid of an improved machine introduced in Germany. It automatically tests the eggs, weighs them and distributes them into five different grades for sale.

The traditional silence of the Arctic has been broken by government radio stations broadcasting news and special programs to the ice-bound inhabitants of Canada's far north. It was announced by Hon. Alfred Durnham, minister of marine. No longer will it be necessary for Hudson Bay factors, trappers, trappers and prospectors to wait months, and sometimes years, to learn what was the world series, the results of Canadian, British or United States elections, how their favorite hockey team is progressing or the same and accomplishments of the latest world celebrity.

Through the government chain of radio stations in the north all such news now is relayed to them a few hours or days after it has taken place. The inauguration of the system was accomplished a few days ago and already the results have justified the effort. Mr. Durnham said. Three of the government radio stations, those at Churchill on Hudson's Bay, Chesterfield Inlet on the eastern side of the bay and Coppermine River on the Arctic Ocean, have been equipped with broadcasting apparatus. Each station goes on the air at stipulated times after it has picked up news synopsis, personal announcements and general information from Canadian, British or United States short-wave stations. This is consolidated and edited before being relayed to the isolated inhabitants of the north.

One of the chief duties of the stations is to broadcast the latest "Social News" of the north. When a trader or trapper leaves a post for another settlement, this is sent over the air and if he does not arrive at his destination on time, immediate efforts are made to locate him. Personal messages from "down south" are sent out to missionaries and traders which might take months to reach them if sent by mail.

Receiving sets are becoming standard equipment with the men of the north. They are looked upon as being almost as necessary as dogs, guns or heavy clothing.

Canada's Blueberry Industry

Figures As To Exact Volume Of Production Not Obtainable

Blueberries represent probably Canada's greatest unorganized industry. No modern methods for cultivating or harvesting have as yet made their appearance in the Dominion, and only a superficial idea of the volume of production is obtainable. They represent both a fresh and frozen fruit trade and at the present time there are some 900,000 lbs. held in storage for the baking trade. Only about one-tenth of this quantity will be used in Canada—Department of Agriculture, Ottawa.

Frog Farming

Manitoba Farmers Have Put Frog Raising On A Commercial Basis

Farmers living at Vito, Man., have discovered a new "mortgage lifter" easily the equal of the homely pig, in frogs. What was formerly a local pest has been turned into a valuable commercial asset. Frog production has been placed on a purely commercial basis by this group of enterprising farmers, whose output is now rated in tons and finds a market at good prices in the hotel and restaurant trade in Eastern Canada and the United States, where frogs' legs are esteemed a table delicacy.

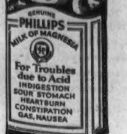

Spain produced more than 7,000,000 tons of coal in the last 12 months.

Tests indicate that oxygen is deadly to mosquitoes in the larval stage.

SOUL STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard anti-acid for 50 years among physicians everywhere. One spoonful will neutralize stomach acids many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods.

Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia as prescribed by physicians for 50 years in correcting excess acids. Remember—the genuine is always a liquid. It cannot be made in tablet form. Look for the name Phillips' on the wrapper for your protection. Drugstores everywhere have the 50c bottles.

CHAPTER X—Continued.

"Close the door, Julie. There's a draught through here and it's going to rain. What time do you expect Mrs. Halliday? I suppose she wanted you tonight because of her company. Will they be here to supper?"

"Who? Mr. Halliday ain't got no company. She ain't Nick (Julie, who had cleaned house for everyone in Bakerville since Nick was a little boy, wouldn't have deigned to say 'Mr. Hastings'), 'started soon as they eat breakfast. Mr. Halliday's away. Not comin' back till tomorrow. He's buryin' his ma."

Gay sat down rather weakly on the stairs.

"I know, but—but I thought she had company. I supposed that was why she didn't go to the funeral."

"You supposed wrong then. I heard her tell Mr. Halliday that 'neer' his ma had never liked her, she didn't see no reason why she should go. I felt kind o' sorry for him, because 'twas plain he was feelin' bad. He said: 'Angela, I'd like you to go with me. What will Mary think? Mary's his sister—an invalid. She can't walk; but just then they see me in the next room and stopped talkin'."

Gay sat very straight on the stairs. Her knees felt as though they wouldn't hold her up.

"Perhaps," she suggested, "perhaps they were to pick up her friends at the station."

But Julie's answer dashed this hope.

"No, they went in the small car, not the new one. Besides, Mr. Halliday put up the lunch, and she only put up enough for two: stuffed eggs, cold chicken, salad sandwiches (every one in a separate place) of paper and the crusts sliced off, spice cake, and—"

A flash of lightning and terrific crash of thunder interrupted. Little Nick, always nervous at any sudden noise, cried out, and even Sony, who had been taught not to mind the storms, scuttled close to his mother's skirts like a frightened chick.

"Geer!" said Julie. "Glad I come over when I did. Say, let's get out of this dark hall. I'll turn on a light in the attic room."

Gay arose, her knees still strangely weak, and lifted her baby.

"Sonny, dear little boy, you go to Julie. There's nothing to be afraid of. Don't you remember what Daddy told you about Rip Van Winkle and the nine-pins? They must be having a splendid game today—Rip and the little brown men."

"I wish Daddy'd turn," said the boy wistfully. "I wish he'd turn."

Tears sprang to Gay's eyes.

"Maybe he'll come soon, darling," she comforted; but Julie, with characteristic tactlessness observed:

"And most likely he won't. They was goun' clear to Mason's Falls. Then hills is awful. That's why she wanted Nick to go, I guess, though I should think she'd stay at home, seein' that she wouldn't go to—"

"Now, Sonny," Julie was saying briskly as she looked from the window, "that storm's most over. I'm going to help you ma, and you just stand here by the window, and if you see your pa and Mrs. Halliday side up, you run an' tell me an' I'll scoot home and let 'em in the front door."

"Oh, Julie," said Gay uneasily, "I mustn't let you see Mrs. Halliday's comin' to my work."

W. N. L. 1875

"Now look her," said Julie sensibly, facing Gay with a hand on either hip, "a fair exchange ain't no robbery. If Nick was home he'd be helpin' you clean up and unpack, or he'd changed some from the boy his Aunt Nettie trained up. And if he's drivin' Mrs. Halliday's car for her, it won't hurt nobody for me to sweep the dust out o' your kitchen. Men folks is terrible careless housekeepers—the best of 'em. Now you run along and make the beds, and Sunday or no Sunday, I'll slick up down here. Mrs. Halliday won't ever know a thing about it—not from me anyway."

The lightning had almost ceased, but it still rained drearily, and the house was dark. Gay glanced at the clock. It was nearly six, and her baby nodded.

"I'll give him some milk and put him to bed now, Julie," she said, "and the time he's off Sony'll be ready for the night. You're good to help me, but—but I'd hate to have Mrs. Halliday find you here."

"She won't find me," Julie was removing her cuffs and turning back her skirt. "I declare, this ain't no count for cleanin', but it's sort o' nifty, don't you think, Gay?"

"Man tum'n," called Sony from his watch tower.

Julie and Gay both turned to the window to see a taxi stopping before the house, next door.

"Glory!" came breathlessly from Julie. "It's him! She didn't expect him till tomorrow. I got to run. What'll he think when I tell him she's been off all day with another feller? Sorry I can't stay, Gay; but likely he'll want some supper. If the storm gets worse again I'll run over, I—"

Julie was still talking as she ran out the door and through the gap in the hedge. Gay, watching in a pained silence, saw James Halliday take a latch key and open his front door. Suddenly she envisioned the lonely home-coming after his sad errand—she remembered Julie's disclosure of those sounds in the night that might have been his wife's sobs, to come home to find his wife gone—a pleasuring-gone with another feller, as Julie put it—gone with Nick—

(To Be Continued.)

Persian Balm—alluring, provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexion of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a perfect toilet requisite for woman who care for charm and distinction. Use it for hands and face.

War-Time Parcel Delivered

Fasted Fifteen Years Ago Was Returned To Sender

To receive a parcel posted to him 15 years ago was the novel experience at Winnipeg, recently, of Pipe-Major (Dick) Cameron, of Brandon. Fifteen years ago a small tin box of cigarettes was mailed to Mr. Cameron, then serving in Flanders with the famous Black Watch Regiment. After many months of travel through the numerous base post offices in war-torn France and Flanders, the parcel eventually was returned to W. Comor, the original sender.

Italy's aluminum industry is expanding.

Stillness is called sentiment by those who are in love.

There! I do believe the worst of it's over. I'm gone out and clean up your kitchen. Mrs. Halliday's payin' for my time so might as well use it. She don't want me for anything but an ornament to her back porch to-day. How do you like my hair this way, Gay? It's the latest style."

"I—I don't think I've got used to it yet," Gay answered, feeling in spite of her foreboding thoughts, a hysterical desire to laugh.

"I'm savin' you for a permanent wave," said Julie. "Then it won't look so straggly. That's what Mrs. Halliday does to hers. Say, you'd ought to see the truck on her bureau! spends enough time an' money fussin' with it! It takes her more'n an hour alone to fix her hair."

"I shouldn't think they'd ever need fixin'," said Gay discouragingly, as she looked down at her own brown hands. Even the month at Uncle Sam's had not entirely obliterated the scars of toil. Nick had once said that her hands were beautiful. They were beautiful no longer—and Mrs. Halliday was soft and white. Was Nick, perhaps, looking at them now, clasped lightly in her lap, and thinking—

comparing—

"Now, Sonny," Julie was saying briskly as she looked from the window, "that storm's most over. I'm going to help you ma, and you just stand here by the window, and if you see your pa and Mrs. Halliday side up, you run an' tell me an' I'll scoot home and let 'em in the front door."

"Oh, Julie," said Gay uneasily, "I mustn't let you see Mrs. Halliday's comin' to my work."

"Now, Sonny," Julie was saying briskly as she looked from the window, "that storm's most over. I'm going to help you ma, and you just stand here by the window, and if you see your pa and Mrs. Halliday side up, you run an' tell me an' I'll scoot home and let 'em in the front door."

"Oh, Julie," said Gay uneasily, "I mustn't let you see Mrs. Halliday's comin' to my work."

"Oh, Julie," said Gay uneasily, "I mustn't let you see Mrs. Halliday's comin' to my work."

"Now, Sonny," Julie was saying briskly as she looked from the window, "that storm's most over. I'm going to help you ma, and you just stand here by the window, and if you see your pa and Mrs. Halliday side up, you run an' tell me an' I'll scoot home and let 'em in the front door."

"Oh, Julie," said Gay uneasily, "I mustn't let you see Mrs. Halliday's comin' to my work."

Keep Free From Fat—Feel Younger

Unlike most salts, Kruschen isn't simply a laxative—if that's all you want any kind of salt with any kind of label will do—this is all you want?

When you take Kruschen Salts you not only stimulate your bowels, liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with nature's own revitalizing rejuvenating minerals.

Get a bottle of Kruschen Salts at any drug store—take one-half teaspoon in a glass of hot water every morning before breakfast—cut down on sweets and fat forming foods and get some moderate regular exercise—in just a few days indigestion changes to activity and life grows brighter.

A Virginia woman writes: "I just started on my second bottle of Kruschen Salts and have been losing flesh along—you have fathomed the secret of flesh reduction."

Silk Trains Listed As "Passenger Extra"

Given Right-Of-Way On Every Road On This Continent

In railroad slang, "in the hole" means putting a train on a switch or siding in order to let a faster or more important train pass it on an obstructed track. Everything and everybody is "put in the hole" for the silk trains at their flight across the continent from the Pacific port of Vancouver, Seattle or San Francisco. It is the right-of-way on every road, and whole railway systems, from vice-president to brakemen, are keyed up and co-ordinated for its impromptu schedule and its safety. On one particular occasion, writes George Marvin in the *Baltimore Sun*, during the transit of a cargo of silk through one stage of its flight from Japan to the Atlantic seaboard, Prince George of England was hustled "into the hole" somewhere between Kamloops and Field, British Columbia, to let the silk train pass.

Well, what's the hurry. Why should such a common commodity as silk hog the road over freight and express, tourists, regular passenger trains and mail? The answer is money—not mere casual money, but an awful lot of money—money in seven figures! When the "Empress of Russia" docked at Vancouver a year ago it carried 4½ million dollars' worth of raw silk in its hold. The week before the "President Madison" had steamed into Puget Sound to discharge a 6-million-dollar cargo on the docks of Seattle.

At 11 o'clock Prince George was on his way across Canada on a train so charged to make up lost time that you would think it impossible to stop. It was after midnight when the silk train pulled off the dock and started east, but before dawn revealed the majesty of the Canadian Rockies it had overhauled and passed a passenger train of the same name, unceremoniously "put in the hole."

Why was this train—why is any train—of fifteen cars, running as a "passenger extra," shot from Vancouver to Port William, 1,896 miles, in fifteen hours—less time than the fastest long distance passenger-express that traverses "the same distance"? The answer is that enough raw silk to fill fifteen cars has value amounting into millions of dollars; it deteriorates rapidly in transit; insurance is very high and the market fluctuates from day to day with the available supply, so that one day may make a difference of as much as 50 cents a bale.

Value, then, makes the speed and "holes" the Prince. But we are still left a little in amazement that silk should attain such value. As gold has become a necessity in international barter as a standard medium of exchange, so has silk become a near necessity as a universal medium of feminine self-expression. If "the colonies' lady and Judy O'Grady are sisters under their skins," almost as certainly are they kindred next to their skins. In their millions the world over they have got to have silk.

Recognised as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It acts fast.

India Will Enter Exhibit

India will exhibit at the World's Grain Exhibition and Conference in Regina in 1932, according to word received from M. B. A. Hydari, I.S.C., secretary of the Imperial Council of Agricultural Research, New Delhi, conveyed through the office of His Excellency the Viceroy. Grain and fodder crops will constitute the display.

Take away the garage, the car, the motor, the bridge table and the radio set and what have you left of the modern home.

New Development in Shipbuilding

Launched With Steam Up and Ready To Go To Sea

For the first time in history a ship has been launched with the steam up and smoke issuing from the funnel and ready to go to sea.

It is a matter of satisfaction that for this new development in shipbuilding England is responsible. The vessel in question was H.M.S. Brilliant, a new destroyer built at Wallsend. The vessel is 323 feet long and has a displacement of 1,330 tons. Guns, engines, masts were all in position. The usual method is to launch the ship as soon as the hull is complete, and then fit it up while it is afloat.

There are spacious and comfortable quarters, including bathrooms, for the crew of the "Brilliant."

Waste Gas May Be Used

Experiments Being Made in Turner Valley Oil Fields

It is believed that Turner Valley gas, which at present is going to waste at the estimated rate of about 10,000 tons a day, can be converted into benzene in sufficient quantities to be commercially profitable, also into alcohol in paying quantities, and the scientific experiments being made along these lines in the oil fields of Turner Valley, Alberta, will be continued on an increased scale. Encouraging reports thereon were made recently at a meeting of the associate committee on gas research of the National Research Council.

Constipated Children

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Dr. Williams' Pink Pills. They are a mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers up and down the world are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Montreal Fur Auction

The recent fur auction of the Canadian Fur Auction Sales Company in Montreal, was pronounced satisfactory as to demand and values. A total of 9,447 fur skins were sold at an average price of \$53.07.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will soothe the inflamed flesh and draw the pain. It will take the ache out of a bruise by interacting the inflammation. A trial will convince any who doubt its power.

Covering fruit with a thin film of vasoline is a new idea in fruit preservation.

Business men of Belgium are optimistic over 1931 prospects.

Winnipeg Building Permits

The total of Greater Winnipeg building permits for the year 1930, amounted to \$6,235,457, which includes the cities of Winnipeg and St. Boniface, and seven municipalities.

The pulp and paper industry is Canada's most important manufacturing industry.

Annual Meeting of Crossfield and District United Church

The annual meeting of the Crossfield and District United Church was held on Wednesday of last week in the Masonic Hall. There was a good gathering, seventy-five to one hundred being present.

After singing a hymn, Rev. Young read a passage of Scripture, and the choir rendered an Anthem. Mr. Stralo was voted to the chair and took charge of the meeting.

C.G.I.T.

The C.G.I.T. Girls set the ball in motion and although the membership of this branch of the church is not very large at present, Miss F. Mobbs gave a very good and interesting report of their work.

TUXIS BOYS

This branch is newly organized under the leadership of Mr. W. K. Gibson, who gave good prospects of work to be accomplished.

SUNDAY SCHOOL

Mr. Waldoe as superintendent gave the report of the work done in this department showing an increasing staff of teachers and number of scholars.

Mrs. Robinson also gave an interesting report of the work she is doing single handed in the Tany-Bryn district in trying to work up a Sunday School for the children of the district.

CHOIR

Mr. Young in absence of Mrs. Young, choir leader, gave this report which showed much good and appreciative work done by the choir.

MINISTER'S REPORT

This report was given by Rev. Young as minister of the church, giving the number of baptismal services, funeral and regular services held in town and country points and thanked each and every one for the loyal support and co-operation given him at all country points.

MANAGER'S REPORT

This was given by Mr. Stralo as chairman of the Board, in which he thanked the various organizations for the support given and hoped that they would continue to rally around the church and with their help and co-operation the church must go ahead.

LADIES AID

This report was given by Mrs. W. Laut as secretary of this branch and gave a very interesting and glowing account of the activities of the Aid, with an income of \$419.00 and an expenditure of \$416.00.

Mrs. Robt. Laut gave an account of the work of the Ladies Aid in the Inverlea District.

SECRETARY'S REPORT

Report and financial statement was given by the secretary J. Belshaw, which showed that the collections from the various points amounted to \$1978.16, and an expenditure of \$1961.78 with a bank balance of \$16.38.

ELECTION OF OFFICERS

The board of the past year were re-elected who were as follows: W. Stralo, G. Murdoch, J. P. Methers, J. R. Gilchrist, W. Waldoe and J. Belshaw. This brought the business part of the proceedings to a close and the rest of the time was of a social order.

Mr. Waldoe took charge of community singing. The Misses Methers rendered musical selections and games were indulged in, giving all the amusement to the gathering they wanted. The older members becoming young again joining in the fun with the younger generation.

The refreshments were taken charge of by the men folks of the congregation who handled the job as men folks can do when called upon especially so with Dad Halliday who was responsible for the making of the coffee and in selling off the surplus of cakes, showed that he only needs a license to make his living as an auctioneer.

The singing of "Blest be the tie that binds" and should "Auld acquaintance be forgot" brought the meeting to a close and everyone went away proclaiming having had an enjoyable evening.

Mrs. H. Young returned on Monday from Lethbridge, where she has been visiting her daughter for the past two weeks.

Rev. Gilmour spoke at the Passion Play at the United Church on Sunday night, to a large congregation. Rev. Gilmour has accepted a call from Carman, Man. and left the first of the week to take over his new charge.

THURSDAY, FEBRUARY 5th.

Local and General

Sam Timmins was a visitor in town on Tuesday.

Mr. J. B. McNicol will celebrate his 81st birthday on Monday. N. A. Johnson has purchased a Sparton radio from the local dealer W. K. Gibson.

We understand that the townsite of Madden was surveyed on Wednesday. Watch Madden grow.

H. McIntyre is drilling a well for Mrs. Stevens at Reeve residence.

Mrs. Porteous of Calgary, formerly of Crossfield was a visitor in town on Wednesday.

R. M. McCool came down from Edmonton on Saturday, returning on Sunday afternoon.

Hurray! The flag pole on the Fire Hall has received a coat of paint at last.

All trails lead to Crossfield on Feb. 11th. The old timers are all coming. Whoop-ee!

Not a dull moment on the night of Feb. 11. The old timers are set and ready to go. Yip!

BORN—To Mr. and Mrs. C. Marston of Calgary on Saturday last a daughter.

BORN—To Dr. and Mrs. Lesmer of Arrowwood on Wed. Feb. 4th, a daughter.

Mr. and Mrs. J. S. Abra and son of Calgary spent Sunday at the home of Mr. and Mrs. W. D. (Jim) McCool.

Wm. Laut and Thos. Tredaway attended the funeral of the late Mrs. D. W. Skinner at the Blue Cell Ranch on Tuesday.

Mr. Wilson McRory has entered on his twentieth year as secretary-treasurer of the Village of Crossfield.

Mrs. (Dr.) Ritchie of Regina arrived here on Tuesday to visit her sisters Mrs. Arnott and Mrs. D. McFadyen.

Hughie Ballam who was operated on in Calgary for appendicitis on Tuesday is doing as well as could be expected.

The Floral Local U.F.W.A. are holding a card party in the East Community Hall on Friday night of this week. Good prizes and an excellent lunch. Everybody welcome.

Mr. T. Amery of Walla Walla, Wash., arrived here on Tuesday and is looking after his business interests in this district.

A most enjoyable evening was spent at home of Capt. and Mrs. Wigle on Friday evening last when they entertained the members of the Oneil 500 Club.

A pleasant birthday party was held at the home of Mr. and Mrs. W. H. McCool on Monday evening. Court whist was played and a dainty lunch was served.

T. Tredaway and Rev. A. D. Currie attended the Synod of the Calgary Diocese at Calgary on Wednesday and Thursday. Mr. Sefton and Mr. Major attended the banquet on Tuesday evening.

Mrs. L. Overby who recently undergone a serious operation at Calgary has made a wonderful recovery and was able to leave the hospital on Sunday and is expected home on Friday.

The Justice Rebekah Lodge held a card party in the I.O.O.F. Hall on Friday night. 13 tables of court whist were arranged. Prize winners were: Mrs. M. Casey, and Ian Laut; consolation prizes going to Mrs. C. Richardson and Win Landmore.

Signs of Spring: A large white butterfly was caught in the home of Mr. and Mrs. J. Crocker the other day; the gophers are out, and poplar trees are in bud, the boys are playing baseball and the elevator men are playing horse-shoes.

A meeting of the executive of the Old Timers' Association will be held in Laut's store on Saturday night of this week when final arrangements will be made for the round-up to be held on Feb. 11th.

Bill Williams, Al. Stevens and Glen Miller motored to Calgary with C. H. MacMillan on Wednesday night and attended the hockey game between Drumheller and the Calgary Bronks. Calgary won two goals to one.

A card party was held at the home of Mr. and Mrs. Guy Wickerson on Friday, Jan. 30th. Six tables of 500 were arranged. Prize winners were: Mrs. A. Ahleman, Clint Thompson and the consolation prizes going to Miss Ruth Stauffer and Guy Wickerson. A dainty lunch was served by Mrs. Wickerson.

J. M. Williams and W. H. Miller motored to Cremona on Sunday. Six new buildings have been erected on the Main Street and others are under construction. The town now consists of a general store, hardware store, drug store, garage, butcher shop, lumber yard, blacksmith shop, barber shop, one elevator, a 2x4 station, section house and stock yards. All that is needed now is a good bootlegger to make the business section complete.

I Saw:

W. K. Gibson selling another Sparton Radio.

Shorty Thomas quite peeved because youngsters that are old enough to know better are continually putting his wheel-chair on the hummer.

Fred Stevens and Chris Asmusen out electioneering.

Tom Tredaway preparing for the Board of Trade meeting.

Archie McFadyen figuring out the hockey league averages.

Several stool-pigeons in town the other night.

Mayor Williams figuring out a plan that will be hard on the dead beats.

Hans Olsen practising on some of the old time music for the Old Timers' Dance on Wednesday night.

ANNUAL MEETING WELL ATTENDED

(Continued from Page 1)

would take place on Monday, Feb. 9th. The poll will be held in the municipal office and will be open from 2 p. m. until 9 p. m.

Mayor Williams realized that it was necessary to curtail expenditures as much as possible, but that roads in the town were in good condition and must be kept up during the year. He also referred to the sidewalks and was convinced that the pavement on Main St. should be patched with Fort McMurray tar sands as he understood it was guaranteed and the cost was \$1.00 a square yard.

It was suggested that the Council inspect some of the walks in adjacent towns that were put in last year with tar sands.

It was moved by W. McRory and seconded by C. Asmusen that the ringing of the curfew bell be discontinued. Carried.

The annual meeting was well attended and the ratepayers present were well satisfied that the Mayor and Council had accomplished a good year's work.

Two good men have been nominated for the council and as only one can be elected, it is up to the voters to get out on Monday next and cast their ballots for the man of their choice. No ratepayer has any right to criticize the council when he is not interested enough to exercise his franchise.

Mark your ballot with an X.

Early Days in Crossfield

About 1902, J. A. Sutherland, now of Drumheller, built the first place of business—a small building on the right-of-way of the R.R.—carried a few groceries, some hardware and lumber.

The same year he erected a good frame building on the site where Wm. Laut's store now stands.

Geo. Becker built the first hotel which was burned some few years ago. The late Mr. Ureghart, the late Jas. McCool and Chas. Hultgren each erected places of business in the block now occupied by the U.F.A. and Baker's Garage.

The C.P.R. station was built in 1904. Prior to that time the station was a box car, and one Mr. Nickles was the first agent. The late W. B. Edwards built and ran a delivery barn for some years on the site where now stands the Home Cafe. Mr. Edwards was killed in the war.

Peter Patmore carried on a real estate business, and was land agent for C. & E. R. R. lands, also acted as homestead locator.

In 1904 there were only three residential houses—newly built, Perhaps in 1906 or '7, the Canadian Bank of Commerce opened a bank in the building now used as Mr. Mobbs' butcher shop, which at that time stood where the bank now stands.

Jas. Cameron was the first manager of the bank here.

In 1906 or '7, a movement was started by P. I. McNally to have the place incorporated as a village, that we might have sidewalks and streets improved, for prior to this there were nothing but trails leading to and through the place. At first he met with but little encouragement. In fact, some strongly opposing the idea of being incorporated as a village.

Finally getting, Mr. Cameron (manager of the Bank) behind the movement, the necessary petition and affidavits were forwarded to the Provincial Government and we became a village in June of the same year.

The Government authorized Mr. Cameron to hold an election for electing a council. The result of the poll: Dr. G. A. Bishop (our first Dr.), J. A. McDougal and P. I. McNally as councilmen. D. J. McKay was appointed first sec.-treas. of the village.

That same year sidewalks were put down and considerable grading was done on the streets.
